1981 PCB SEMINAR

Jointly sponsored by the American Public Power Association
Arkansas River Power Authority and the
Colorado Association of Municipal Utilities

October 21 - 22, 1981
STAPLETON PLAZA (AIRPORT)
3333 Quebec Street
Denver, Colorado

NOTE: (*)denotes confirmed speaker

Wednesday

11:00a.m. - 5:00 p.m.

Registration

1:00

Introduction and Welcome

APPA -

ARPA - James M. Henderson*

CAMU -

1:15-2:15

EPA's Interim Regulation Program

Bill Gunter, EPA, or EPA official from Denver

The interim program, including: the EDF decisions; the program's requirements; and how a utility must meet those requirements. Special mention will be made of the treatment of food and feed facilities and the interim program's relationship to the postponement of additional food and feed regulation. EPA's current PCB enforcement policies will also be discussed.

2:15-2:30

Administration and Congressional Update

Andrew C. Hirsch, APPA*

The public comment period for the new PCB regulations ends on December 7th. What might those regulations require, and when might they be promulgated, will be discussed. What, if any, additional Congressional action is expected.

2:30-3:15

Tennessee Valley Authority - PCB Program

W. Ward Filgo, Office of Power Operations*
Tennessee Valley Authority

TVA's PCB program will be described. New management techniques and disposal methods are being used by TVA and they will be discussed.

3:15-3:30

Coffee Break

CTY0069381

SEA315795

3:30-4:30

A PCB Management Program

Tim Gustafson, Colorado Springs*

A detailed review of a municipal utility's PCB program. What are the record-keeping, reporting, spill prevention, clean-up, and personnel requirements. PCB policies and internal manuals will be presented to assist systems with their own PCB management.

4:30-5:00

PCB Research Update

Dr. Ralph Komai, EPRI*

The EPRI PCB research programs, with particular emphasis on disposal techniques and PCB detection (concentration) device development.

6:00

Reception

Thursday

9:00-10:15 a.m.

How to Handle an EPA Inspection

Bud Sperry, Sacramento Municipal Utility District*

Presentation will include:

- Preparation for a possible EPA inspection.
- How to deal with an inspector should one arrive.
- How to manage PCB records so that the agency will be able to document your compliance.

10:15-10:30

Coffee Break

10:30-11:30

PCB Concentration Testing

John Jenkins, Hewlett-Packard*

Procedures for testing PCBs will be explained. Gas chromatography will be discussed and a sample test result presented. Also described will be how several systems can join together to do their own testing.

11:30-1:00

LUNCH (on your own).

1:15-3:30

Disposal Techniques - Panel Discussion

Chaired by Dr. Ralph Komai, EPRI*

1:15-2:15

Sunohio's PCBX - Ted Savastano, General Manager*

2:15-3:00

ENSCO Incineration - Charles Robertson, Exec. Vice President

3:00-3:30

Other Disposal Techniques - Dr. Ralph Komai, EPRI*

Panel presentation will detail the costs and availability of the various PCB disposal methods. Legal and technical issues will be addressed. Also included will be an estimate of the future availability of various PCB disposal techniques.
